PROFILE

.NET Backend Developer and Computer Science student with hands-on experience building scalable RESTful APIs using ASP.NET Core and SQL Server. Passionate about designing clean, maintainable systems following Clean Architecture principles and backend best practices. Seeking a Backend or Full Stack Developer role where I can contribute to impactful software projects while continuously expanding my technical expertise.

EDUCATION

Bachelor of Computer Science (CS)

Faculty of Computers and Informatics, Suez Canal University | Oct 2022 – Present

- Focus: Object-Oriented Programming (OOP), Data Structures, Algorithms, and Distributed Systems.

TECHNICAL SKILLS

- Core Technologies: C#, .NET 6/7/8, ASP.NET Core Web API, ASP.NET Core MVC, LINQ, Entity Framework Core (EF Core)
- Frontend: HTML5, CSS3, JavaScript, React
- Database: Microsoft SQL Server, T-SQL, Database Design
- Architecture & Patterns: Clean Architecture, RESTful APIs, Repository Pattern, Unit of Work, Dependency Injection (DI)
- Tools & DevOps: Git, GitHub, Postman, Swagger UI, Docker (Basics), Azure (Basics)
- Testing: Unit Testing (xUnit/NUnit Fundamentals)

PROFESSIONAL EXPERIENCE & TRAINING

Instructor — SPME Academy

SPME Academy | Jul 2026 – Present

- Deliver technical training sessions and explain programming concepts through practical examples and hands-on exercises.
- Assist students in understanding coding concepts, debugging issues, and developing practical solutions.
- Support learners in applying programming fundamentals and software development best practices.
- Provide guidance and feedback to help students improve their technical and problem-solving skills.

Full Stack .NET Web Developer Trainee — Digital Egypt Pioneers Initiative (DEPI)

Ministry of Communications and Information Technology (MCIT) | Oct 2025 – Jul 2026

- Completed an intensive Full Stack .NET training program covering C#, ASP.NET Core Web API, ASP.NET Core MVC, SQL Server, HTML5, CSS3, and JavaScript.
- Built modern web applications and RESTful APIs using ASP.NET Core, Entity Framework Core, and SQL Server.
- Applied Git/GitHub, Docker fundamentals, Unit Testing, and software documentation practices throughout the training.
- Completed a capstone project following industry best practices for software design, development, testing, and deployment.

Backend & IoT Intern — Port Said Holding Company for Cargo & Containers Trading

Oct 2023 – Mar 2024

- Assisted in backend-related tasks supporting internal systems and operational workflows.
- Participated in integrating IoT data with backend services for monitoring and reporting purposes.
- Worked with databases to store, retrieve, and organize operational data.
- Supported system documentation and basic API testing to ensure reliable data flow.
- Gained practical exposure to how backend systems and IoT solutions support logistics and port operations.

TECHNICAL PROJECTS

TripMind – AI Travel Planning Platform (Backend)

Nov 2025 – Jul 2026

- Developed a scalable ASP.NET Core Web API for an AI-powered travel planning platform following Clean Architecture principles.
- Implemented JWT Authentication, role-based authorization, and secure RESTful APIs for users and administrators.
- Integrated AI-powered itinerary generation and trip customization features through external AI services.
- Built modules for destinations, trips, bookings, user profiles, and itinerary management using Entity Framework Core and SQL Server.
- Documented and tested APIs using Swagger and Postman.

- Tech Stack: ASP.NET Core Web API, Entity Framework Core, SQL Server, JWT, Clean Architecture, Swagger, Postman.

EgyMediChain – Healthcare & Pharmacy Management System

Full Stack ASP.NET Core + React | May 2026 – Jul 2026

- Developed a full-stack healthcare platform using ASP.NET Core Web API and React.
- Built authentication and authorization with JWT, supporting multiple user roles including Admin, Pharmacy, and Customer.
- Implemented pharmacy registration, profile management, image upload, and approval workflows.
- Designed RESTful APIs with Entity Framework Core and SQL Server and integrated the frontend using Axios.
- Collaborated using Git/GitHub, performed API testing with Postman, and documented endpoints with Swagger.
- Tech Stack: ASP.NET Core Web API, React, Entity Framework Core, SQL Server, JWT, Axios, Swagger.
